A

- 9. (Amended) A process as claimed in Claim 7, wherein the blend further comprises a modacrylic copolymer comprising from 35 to 85 weight percent acrylonitrile units and having the balance made up substantially of other addition polymer-forming units, being halogenated hydrocarbon such as vinyl chloride or vinylidene chloride.
- 10. (Amended) A process as claimed in Claim 7, wherein the weight ratio of component (a) to component (b) is in the range 70:30 to 30:70.

A3

12. (Amended) A process as claimed in Claim 7, wherein the linear density of the fibres in component (a) and component (b) is in the range 0.1 to 10dtex.

A4

14. (Amended) A process as claimed in Claim 1, wherein the fibres have a diameter of 12μm or less.

A5

17. (Amended) A filtration medium as claimed in Claim 15, wherein the web comprises a blend of fibres of two or more types of fibre.

AS

- 20. (Amended) A filtration medium as claimed in Claim 18, wherein the blend further comprises a modacrylic copolymer comprising from 35 to 85 weight percent acrylonitrile units and having the balance made up substantially of other addition polymer-forming units, being halogenated hydrocarbon such as vinyl chloride or vinylidene chloride.
- 21. (Amended) A filtration medium as claimed in Claim 18, wherein in the weight ratio of component (a) to component (b) is in the range 70:30 to 30:70.

AT

23. (Amended) A filtration medium as claimed in Claim 18, wherein the linear density of the fibres in component (a) and component (b) is in the range 0.1 to 10dtex.

A8

- 25. (Amended) A filtration medium as claimed in Claim 15, wherein the fibres have a diameter of 12µm or less.
- 26. (Amended) A filtration medium as claimed in Claim 15, which has a weight of from 200g/m<sup>2</sup> to 1000g/m<sup>2</sup>.

Aq

- 28. (Amended) A filtration medium as claimed in Claim 15, which comprises a blend of fibres selected from the group consisting of
  - a) Polyvinylchloride / Polypropylene;

Aq

- b) Polyvinylchloride / Modacrylic / Polypropylene;
- c) Polyvinylchloride / Polypropylene / Polyethylene; and
- d) Polyvinylchloride / Modacrylic / Polyethylene.
